## VIBRO FLEX HYDRAULIC FOLDING TILLER SERIES

### TECHNICAL SPECIFICATIONS

The Hydraulic Folding Vibro Flex series is available in 6.0m and 8.0m and is designed to fold up so that transporting it is easier and not as bulky. The 6.0m and 8.0m models come standard with depth-control wheels and the height can be set enabling the machine to maintain the working depth throughout the working process. Rollers/crumbler are available as optional extras allowing for a smoother seedbed which is clod-free.

| STOCK CODE | FRAME       | NUMBER OF TINES | TOTAL WIDTH | WORKING DEPTH |
|------------|-------------|-----------------|-------------|---------------|
| AVBTH 3/25 | TRIPLE BEAM | 25              | 6 000mm     | 50-150mm      |
| AVBTH 3/33 | TRIPLE BEAM | 33              | 8 000mm     | 50-150mm      |

  

| DEPTH CONTROL WHEELS | WORKING WIDTH | SPACE BETWEEN TINES | TINE LENGTH | REQUIRED POWER |
|----------------------|---------------|---------------------|-------------|----------------|
| STANDARD             | 5 750mm       | 250mm (ADJUSTABLE)  | 650mm       | 125-140 kW     |
| STANDARD             | 7 750mm       | 250mm (ADJUSTABLE)  | 650mm       | 165-180 kW     |
