

Volume Trading Strategy

Watch this video first :

<https://www.facebook.com/moreconfidenttrading/posts/641804279359264>

White vertical lines is where the Smart money is most active. Sometimes a cluster of 2 or more bars.

Normally a Pull back or Reversal occurs within 5 bars of this Smart money bars.

Wait for Buying/Selling pressure (Cyan line turning up or Dark red line turning down) on Volume Simplified Oscillator (normally leads price) and

Volume Flow (Dots and Arrows in chart) to confirm Pull backs and/or Reversals.

These tools is ALL based on VOLUME which is the RESULT of SUPPLY and DEMAND. Any event that drive any market has a resulting Volume Flow consequence, created by Supply and Demand!

STRATEGY :

Using these Volume Tools is easy and Fundamentally sound and the Strategy has 3 steps :

1. After Smart money bars (at highs and lows - trade location also important) wait for Selling and Buying Pressure AND Volume Flow Confirmation.
2. Look at Support and Resistance (we use volume profile) for determining entries and targets.
3. and Time your entry with any Price indicator of your choice and you have a WINNER.

Use all sound trading rules and technics for example :

Determine a sufficient risk reward ratio *Before* the entry.

Determine the Profit target and the line in the sand (stop) *Before* the entry.

Use stops that allow enough room for the trade to breathe.

Do not over trade.

Use Common sense.

Last but not least CUT any emotions at ALL times.

WINNER WINNER CHICKEN DINNER!!
